50X1-HUM

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. Inside the Dostran Massif (that is, in the peninsula between Martinscoia near Susak and the southwest bank of the bay of Bakar), a very large subterranean depot for naphtha and other liquid gases is being constructed for strategic purposes. The exact location is two-thirds of the way from Bakar along the southwest shore, immediately opposite the carbon black plant half way down the east shore.
2. The site is well camouflaged but can be seen from the opposite side of the bay. It is not visible from the road running immediately above it. There are two main entrances which lead into the rocks at a distance of about one kilometer from the town of Bakar.
3. What appear to be the tops of three storage tanks are visible, though these may be entrances. As there are jetties at the water's edge, presumably transportation of oil will be by sea. There does not appear to be much work in progress on the site, which may indicate its completion.
